

## Veggie-mon Under the Sun

### Across

- used to protect the skin from ultraviolet light
- energy produced in the form of rays or waves
- dangerous type of skin cancer
- forms a layer that protects and screens some UV radiation

### Down

- takes electrons away during a chemical reaction
- dark brown or black pigments
- wavelength shorter than visible light
- one billionth of a meter
- distance from the peak of one wave to the peak of the next
